

Reporting Dates 2020-2021

Interim Reports will provide parents/carers with an update from each subject area including a rating for Effort, Behaviour and Homework. S5/6 will also include a Target and Working Grade.

The Target Grade is determined through communication with the young person, and is not reflective of their work within the subject.

The Working Grade provides an overview of current progress within the subject. Teachers use a range of evidence including classwork or an assessed piece of work, and their professional judgement to determine a working grade. It is important to point out that the working grade is likely to change as we progress through the year and the young people develop further skills within the curricular area.
